

Supplement your STEM Curriculum

We offer a great deal for you to be able to use the **latest digital technology** products in school for specific projects. **Hire out** a set of state of the art **data loggers** for use with all computer types. Download the free software, access the experiments and step by step guides. Have the kit in school for a **half term project** to maximise your budget and enable your class to engage with technology.

Plan your topic for the half term ahead, order your devices, **download the free software**, take delivery of the devices and deliver your topic. At the end of the period simply return the devices complete with accessories.

The devices come with their own external sensors, Voltage, Current, Air pressure, pulse, External temperature sensor.

Other Sensors are available to hire separately.

Product	Number	Hire cost per week	Cost to hire half a term*
